

Task Factory

SSIS Components That Save You Time and Money

SentryOne Task Factory is a set of high-performance SQL Server Integration Services (SSIS) components and tasks that eliminate the need for programming. For organizations that build data-centric apps, using Task Factory components decreases development time and accelerates performance of business-critical systems.

Development team bogged down with building SSIS packages?

Organizations building data-centric applications on the Microsoft data platform face challenges, including:

- Excessive development time spent programming custom SSIS tasks
- SSIS components and tasks that aren't optimized to perform well in production
- Difficulties connecting to a broad array of data platforms
- Difficulties loading and managing the data warehouse

Task Factory increases productivity and speeds application performance

With more than 60 high-performance SSIS components, Task Factory:

- Eliminates the need for tedious programming
- Simplifies data access from multiple sources
- Ensures SSIS components are optimized for compatibility with the latest version of SQL Server
- Simplifies component loading and data warehouse management
- Can be used with Microsoft developers' native environment—Visual Studio

Task Factory Features and Highlights

Connectivity

Stay connected to all of your data. Pull information using SSIS from platforms such as Hadoop, SharePoint, Salesforce, Facebook, Twitter, and REST web APIs.

Productivity

Increase productivity and decrease development time by eliminating the need to program custom tasks.

Performance

Task Factory components are optimized to run much faster than the native SSIS components.

Data Warehouse Management

SSIS components designed to load easily and manage your data warehouse.

Popular Commands and Tasks

Salesforce Destination and Source

With a few clicks, add data to and retrieve data from your Salesforce account.

Fact Table Destination

Reduce development time for SSIS packages with multiple dimension lookups.

REST Source

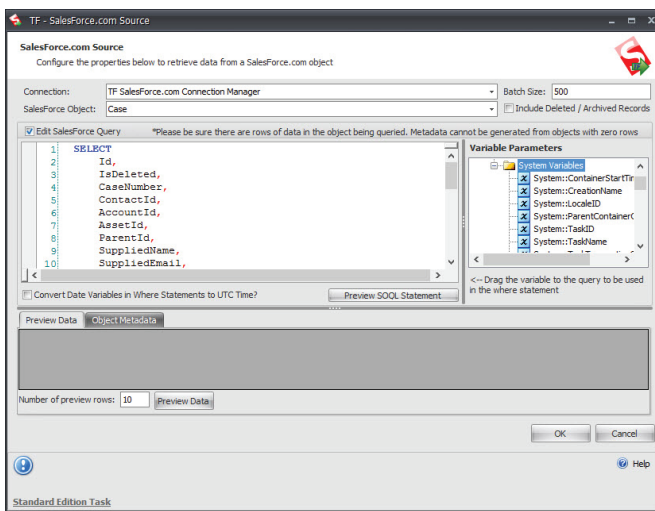

Connect to any web service that uses a REST API and extract data in XML or JSON format.

Secure FTP Task

Bring encrypted security to your FTP within SSIS. The Secure FTP Task transmits files over most common secure channels to your partners safely.

Dimension Merge SCD

Experience loading a dimension up to 700 times faster in SSIS. With SentryOne Task Factory, handle most dimension loading scenarios in-memory with a few clicks.

The Task Factory Salesforce Source: In a few clicks, retrieve data stored in your salesforce.com account.

Pricing

Task Factory Standard	
Perpetual license per server	\$1,795
Annual maintenance	\$355

Task Factory Pro	
Perpetual license per server	\$2,495
Annual maintenance	\$495
